

RELATIONS WITH EDUCATION RESEARCH AGENCIES
(Surveys and Questionnaires)

Surveys and questionnaires, from sources such as students in college courses, from private concerns or any other agencies on gathering information, whether school-related or not, will be conducted in any public schools and Bristol and Warren without clearance and approval of the principal and without notification to the office of the superintendent. School-related questionnaires and surveys gathering information for the public schools emanating from the superintendent's office will continue as in the past. Principals should limit their individual building surveys and questionnaires to a minimum and use only when absolutely necessary for their particular building operation needs.
